GFI MARKET DATA
Better data. Better decisions

GFI Bond Market Data

Insights by – and for – people who know the markets.

If you're a risk manager, credit officer, fund manager, analyst, sales professional, regulator or other financial market participant, you need market data that provides a complete picture of the market .

Introducing GFI Bond Market Data. This new offering from GFI gives you a fuller view of the bond market, providing hard-to-find, independent and comprehensive real-time and historical data.

These are not data streams you can acquire from any other provider. These are deep data insights to support your valuation and risk management processes. All from a global leader you can trust.

Whether you're seeking an accurate source for evaluated prices, using data to support back office risk management or looking for independent price verification, GFI Bond Market Data has you covered.

The GFI Difference

With brokerage operations in credit, equity, FX, energy & commodities, and emerging markets, GFI is a globally recognized information hub for cash and derivative products – and is uniquely positioned to provide the capital markets with the data they need.

GFI operates bond desks in New York, London, Hong Kong, Tokyo, Dubai, Sydney and Buenos Aires. This unique global presence enables GFI Bond Market Data to provide both a global view of the fixed income markets and critical insights for valuation and risk management functions.

Cash and spread bond prices are sourced directly from GFI CreditMatch, GFI's award-winning electronic trading platform for bonds and fixed income derivatives. This ensures that clients always receive data in the most timely fashion, with the extensive coverage only available from an interbank broker.

Features & Benefits

Feature	Benefit
Independent data from a trusted interbank source	Real prices that reflect real market sentiment
Intra-day hourly, end-of-day, weekly or monthly feed	Flexible access to accurate pricing
A global file containing data from all regions, plus hard-to-find files from emerging markets across Latin America, Eastern Europe and Asia	Unrivalled access to emerging markets data
Accurate coverage of prices for a broad range of bonds	Fuller picture that includes high yield and illiquid bonds, corporate bonds and structured products
Coverage of multiple maturities	A picture that includes short-term bonds to maturities of over 10 years
Historical data available from January 2008	The data you need to make informed decisions

GFI

GFI Bond Market Data
Insights by – and for – people who know the markets.

A Full Range of Coverage

GFI Bond Market Data provides bid and offer prices for a broad range of instruments, including:

- **Asset Backed Securities**
- **Corporate Bonds**
- **Emerging Market Bonds**
- **Floating Rate Notes**
- **High Yield Bonds**
- **Investment Grade Bonds**
- **Preferred Bonds**
- **Senior and Subordinated Financials**
- **Sovereign Bonds**

This offering is available as either one global service or in three regional services: Americas (North and Latin America), Asia or Europe, Middle East and Africa.

Quality and Quantity

Prices are analyzed using both experienced data analysts and statistical cleaning algorithms; ensuring data is the highest quality. Errors are automatically flagged and excluded from the distribution databases until they are either verified with the market or corrected.

The Data You Want, The Way You Want It

Data is available as intra-day hourly, end-of-day, weekly or monthly files from GFI's FTP servers, which allows users to automatically download updated data at set time intervals. Delivery platforms and technologies include:

- **Web**
- **FTP servers**
- **Streamed directly into front-end applications**

About GFI Market Data

Demands for market transparency and new accounting standards are challenging participants in the derivatives markets. An independent intermediary in typically highly specialized markets GFI can assist the buy and sell-sides by providing them with hard to find, independent and comprehensive real time and historical data.

The presence of brokerage operations in such specialized markets means that GFI is ideally positioned to provide the capital markets with data which reflects actual market conditions and sentiments.

Data Sets

GFI is continuously making new data sets available to its customers. Current data sets include:

- **Credit:** Credit Derivatives, Bonds
- **Energy & Commodities:** Dry and Wet Freight, Emissions, Coal, Power, Gas
- **Equities:** Asia Equity Index Option Volatilities
- **FX:** FX Options, FX Options Revaluation Service
- **Interest Rates:** Interest Rate Options (ATM and Skew)
- **Emerging Markets Eastern Europe:** Non-deliverable Forwards and Interest Rate Swaps
