# GFI FOREXMATCH®

GFI ForexMatch® is GFI's innovative electronic trading system for FX derivatives. It supports GFI's hybrid brokerage model, combining sophisticated electronic trading technology with voice brokerage services to deliver the most efficient deal execution. GFI ForexMatch® brings together the most advanced interactive technology for best execution and first-rate post-trade services, including confirmation and straight-through processing (STP) of both voice and electronic trades.

## GFI FOREXMATCH®

GFI ForexMatch® streamlines price discovery, allows online trading of FX instruments and facilitates the analysis of market trends with the latest tradeable prices.

GFI ForexMatch® enables trading on FX Options, LATAM NDF, Cross Currency Basis Swaps, LATAM Inflation Forwards, Swaptions, Forwards, At-the-Money Caps and Floors, and LATAM Interest Rate Swaps.

## SPECIFIC INTEREST & PRICER

- Ability to price and 'Request for Quote' up to 16 option types and unlimited number of structures
- Interactive price discovery and trading for every OTC quoted option in the market
- Real-time volatility interpolation from tradeable source for every price request
- On-the-fly updating of delta and strike-specific options in the market

## GFI FOREXMATCH® API

GFI offers a bi-directional trading API that enables client-side trading applications to get electronic access to live market prices.

GFI API supports the industry standard Financial Information eXchange Protocol (FIX). GFI API supports both order processing and market data in its FIX implementation.

## POST TRADE SERVICES INCLUDING STP

GFI ForexMatch® connects directly to FENICS Professional™, GFI's platform for pricing, analysing and managing currency option positions. This allows for a ready-made STP solution through which customers can pass trade details for further analysis, trade confirmation and accounting entries.

Clients can also choose to connect to GFI's FX Blotter STP, which seamlessly passes trade detail information to all parties involved in real-time, without manual handling or redundant processing.
