

Press Release

New York, March 7, 2013

FENICS® and Traiana™ Launch FX Trade Repository Reporting and Clearing Solution via Harmony for FENICS Professional™ Users.

FENICS® Software Ltd, a GFI Group Inc. (NYSE:"GFIG") company, announced today that it has signed a business alliance agreement with Traiana™, Inc. ("Traiana") which integrates FENICS Professional™ with Harmony TR Connect and CCP Connect. This integration will allow for FENICS customers to manage the reporting of OTC FX derivatives into swaps data repositories and clearing houses.

With the new solution, customers using FENICS will gain the ability to real-time report into and reconcile with trade repositories via the Harmony Network, including the DTCC Swaps Data Repository (SDR), Global Trade Repository (GTR) and other trade repositories required globally by regulators. In addition, with the same connectivity to Harmony, FENICS customers will also be able to manage the affirmation, allocation and clearing process with their clients, counterparties and clearing houses (CCPs) under U.S. and European swaps regulations.

Under the agreement, FENICS customers will be able to submit reportable FX trades (including options, deliverable forwards, non-deliverable forwards and swaps) to trade repositories via the TR Connect service as well as receiving relevant trade enrichment information that is reported back to them.

Richard Brunt, Managing Director of FENICS, said "We are delighted to have signed this partnership with Traiana. There are great synergies between the two services. Traiana delivers connectivity to trade repositories to the FENICS client base who already use the FENICS Professional desktop for their FX derivatives workflow". Brunt continued "Our initial rollout campaign will be in the U.S, but we have already had strong interest in this initiative from clients in other regions, which is hugely encouraging."

Andy Coyne, CEO of Traiana added, "We are pleased to partner with FENICS to help their customers comply with the rapidly changing and complex regulatory environment in the U.S. and globally. FENICS is a proven leader in their space and by integrating Traiana's trade repository connectivity into the FENICS platform, our customers and the FX industry will achieve compliance with new reporting regulations at lower costs."

Harmony TR Connect provides a messaging hub for connectivity between market participants and trade repositories, supporting the workflow, routing, matching and state management associated with reporting activities. This includes key functions such as initial trade reporting, USI storage, LEI/UPI storage, lifecycle and state management, trade amendments, cancellations and snapshot reporting.

Harmony CCP Connect provides a comprehensive workflow solution for client clearing via the Harmony network, including CCP connectivity, trade routing, affirmation, matching, allocation, and reporting for centrally cleared OTC FX options and non-deliverable forwards (NDFs). With a single connection to Harmony CCP Connect, firms also have a gateway to other leading FX infrastructure operators, ensuring clients can use their preferred trading, allocation and confirmation venues with complete interoperability.

Fenics® Software Limited is a subsidiary of GFI Group Inc.

About Traiana

Traiana, Inc. (www.traiana.com) provides global banks, broker/dealers, buy-side firms and trading platforms with services to automate post-trade processing of financial transactions in listed and over-the-counter trading markets. Traiana's post-trade solutions and the Harmony Network have become the market standard for post-trade processing of foreign exchange, exchange traded derivatives, synthetic and cash equity transactions. Traiana™, an ICAP company, is headquartered in New York City with offices in Chicago, Hong Kong, London, Tel Aviv and Tokyo.

Forward-looking statement

Certain matters discussed in this press release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. When used in this press release, the words "anticipate," "believe," "estimate," "may," "might," "intend," "expect" and similar expressions identify such forward-looking statements. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein.

These forward-looking statements are based largely on the expectations of GFI Group Inc. (the "Company") and are subject to a number of risks and uncertainties. These include, but are not limited to, risks and uncertainties associated with: economic, political and market factors affecting trading volumes; securities prices or demand for the Company's brokerage services; competition from current and new competitors; the Company's ability to attract and retain key personnel, including highly-qualified brokerage personnel; the Company's ability to identify and develop new products and markets; changes in laws and regulations governing the Company's business and operations or permissible activities; the Company's ability to manage its international operations; financial difficulties experienced by the Company's customers or key participants in the markets in which the Company focuses its brokerage services; the Company's ability to keep up with technological changes; uncertainties relating to litigation and the Company's ability to assess and integrate acquisition prospects. Further information about factors that could affect the Company's financial and other results is included in the Company's filings with the Securities and Exchange Commission. The Company does not undertake to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
